

Blacklist Policy¹

In line with GCC health ministers decision No. 21 of 1983 on Mutual Exchange of Information on Professionals, the Department maintains a blacklist of health practitioners who are banned from applying for health practitioner licenses in Qatar.

If the Department wishes to place an applicant or practitioner on the NHA blacklist, it must demonstrate in writing its case for doing so and obtain the approval of the PLC. And if the Department receives an application from someone on the GCC blacklist, it must seek the PLC's advice on whether or not to receive the application.
